

EHSAN ESLAMI

full stack web developer

ABOUT ME

I am full stack developer. During 6 years, I have played a key role in analyzing and implementing content management and knowledge management systems professionally in software companies. I have implemented projects in the field of educational management and store websites. I am interested in learning the latest technologies. I have done many of my freelance projects as a team and with the training of team members. I am interested in learning and teaching programming to team members.
